### **Research**

I have worked in three main directions:

- developing formal models for syntactic analysis, especially Lexically Tree Adjoining Grammar (LTAG), and Head-driven Phrase structure Grammar (HPSG),
- empirical analysis of French syntactic phenomena and other languages, especially Romance languages, with corpus-based and experimental methods ; culminating in the publication of the *Grande Grammaire du français*
- production of linguistic resources, especially the *French treebank*, a richly annotated corpus of newspaper texts, freely distributed for reserach purposes, with hundreds of users worldwide.

I have been involved in many research projects, recently:

- 2010-2013 : Typology of elliptical constructions (TUL federation, CNRS), with F. Mouret ;
- 2011-2012 : PEPS project INSHS-INSII (CNRS) *Syntactic analysis of spoken French*, with C. Gardent (Loria),
- 2003-2021 (with D. Godard) : *Grande Grammaire du français*, gathering 59 linguists for 2 volumes on the syntax of contemporary French (written and spoken, in France and world wide). Funded by ILF (CNRS), U. Paris 7, DGLFLF and LabEx EFL.
- 2012-: *Experimental grammar in a cross linguistic perspective* (head of strand 2 of Labex EFL)
- 2016-2020 : GDR-i CNRS *Pidgin and Creole Languages* (PI E Schang)
- 2017-2020 Procope project *One-to-Many Relations in Morphology, Syntax and Semantics* (PI B Crysmann, M. Sailer) with U. Frankfurt
- 2017-2019: project Korean Research foundation : *Processing the silence* (PI J-B. Kim, Seoul)
- 2019-23 : CNRS GDR *LIFT* (Fieldwork, formal and computational Linguistics), PI C. Gardent.
- 2020-2023: project NSF : *Evaluating meaning-based approaches to locality constraints* (PI E. Gibson, MIT)
